Made with selected materials and components to grant quality, duration, efficiency and through outputs, the ZXM6-NHLD144 double glass modules by ZNSHINE SOLAR feature have both decorative and shading functions. They represent the perfect choice for BIPV and BAPV construction applications. This allows you to produce clean energy whilst reducing your energy bill.

ZNSHINE SOLAR'S ZXM6-NHLD144 double glass solar modules are tested and approved by international acknowledged laboratories, so that we can offer our customers a reliable and price-quality optimized product.

12 years product warranty/30 years output warranty

0.5% Annual Degradation over 30 years

More power output

Module RS decreases, FF (fill factor) increases, power gain is stable above 1.5%, and can be increased by 5~10W

High Efficiency

Graphene coating can increase about 2W of the module efficiency by rising around 0.5% of the light transmission

Anti PID

Limited power degradation of ZXM6-NHLD144 module caused by PID effect is guaranteed under strict testing condition for mass production

Better Weak Illumination Response

Lower temperature coefficient and wide spectral response, higher power output, even under low-light settings

Easy to install

The module is very light in weight so the installation is easier and transport costs are lower

Graphene Coating

Graphene coating modules can increase power generation and self-cleaning, also can save maintenance cost
